

# Bento®

Bento for iPhone and iPod touch.

Bento for iPhone and iPod touch is the portable version of the widely popular personal database from FileMaker® - that's easy to use as your iPhone!

## Bento to go

Now your Bento information will always be at your fingertips in an incredibly cool and easy-to-use application designed specifically for the iPhone and iPod touch.

Get instant access to details when you're away from your Mac. View libraries and collections, create new records, edit details, sort data, modify forms – even use the iTunes-style search to find information quickly when you're on the go.\*

Or, choose from 25 pre-designed, ready-to-use templates that can be customized with a few taps so you can organize virtually any type of information you have – on your iPhone or iPod touch.

## Plays well with others

Bento for iPhone works with the information and applications you already have on your mobile device, such as Contacts, Safari, Mail, and Google Maps for a truly integrated iPhone experience.

## Stays in sync

Bento for iPhone is a great standalone application, but it also synchronizes directly with Bento 3 running on a Mac so you can automatically keep your desktop and mobile device up-to-date whether you edit information on your Mac or on the go.†

### Minimum Requirements

- iPhone or iPod touch
- iPhone OS 3.0 or later
- Connection to WiFi network for syncing with Bento desktop software

*Whether you need to manage contacts and club members, coordinate projects and parties, or track movies and music, it's never been easier to organize all the details of your busy life – in one iPhone application that works seamlessly with Bento for Mac!*

\* Some items may not be created, edited, or synchronized. See website for full product details.

† Desktop synchronization requires Bento 2.0v5 or Bento 3 for Mac, or later.
